**Two Step Software Announces
Latest Release of Corporate Focus**

*Version 6.4 Streamlines Data Entry, Stock Certificate Printing and
Ownership Reporting for Law Firms Tracking Many Legal Entities*

Needham, MA – July 29, 2010 — Two Step Software, Inc., a leader in entity management, ownership administration and corporate compliance solutions, offers lawyers and CFOs easier data entry, stock certificate printing and ownership reporting with the latest release of its browser-based, entity life-cycle management system. Version 6.4 of [Corporate Focus](#) and [Equity Focus](#) includes a number of new features that continue to simplify comprehensive entity management and ownership reporting for users.

“Given that our Corporate Focus customers are frequently tracking hundreds or even thousands of legal entities, every efficiency enhancement we provide can have a significant impact on productivity,” explains Gary D. Levine, CEO of [Two Step Software](#). “Our attorneys and their staffs are always looking for ways to get more done in less time. Better productivity translates directly into better client service, which in turn improves the bottom line.”

The new features in Version 6.4 include:

- The ability to more easily mark reports as favorites
- Simplified printing interface for stock certificates
- Faster, more sophisticated search capabilities for list fields
- Additional convertible information displayed on capitalization tables
- New report that groups ownership records by state of residence
- Enhanced audit trail based on user feedback

With respect to stock certificate printing, the new Corporate Focus release offers a more streamlined approach to choosing which stock records to print. Additionally, for those who print certificates directly to blank sheets of paper, two more colors have been added. Having a total of five colors to choose from now gives users more flexibility and choice for the latest plain paper stock certificates.

Levine says, “This release highlights the power of a SaaS, hosted offering where smaller and more frequent enhancements will collectively make life much easier for the attorneys, paralegals and CFOs who use our system. At the end of the day, that is our ultimate objective – efficiency and usability.”

Version 6.4 of Corporate Focus is now available. Those interested in obtaining more information about this release should visit the customer support section of the [Two Step Software](#) website.
